# The Opportunity

## DEFENCE

Providing commercial,  
on-demand broadband  
connectivity

## TELECOM OPERATORS

Enabling access to  
'Difficult to Reach'  
regions (4bn people)

## GOVERNMENTS

Underpinning the roll  
out of digital services;  
driving GDP growth

# Methera System

**Competition** focused on global service to dispersed customers:

- Lack 'Capacity Density' and 'Adaptability'

## LEOs

- 1,000s of satellites
- Fixed coverage area
  - 70% of Earth is water

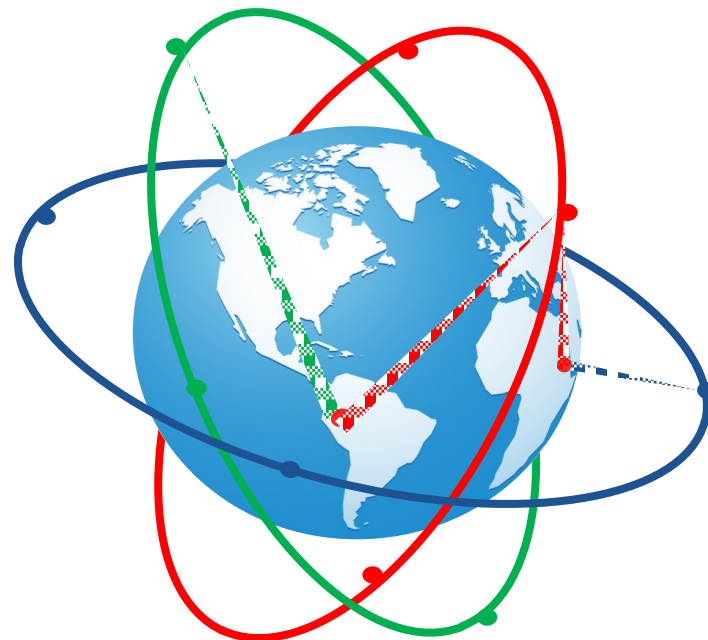

## GEOs

- Expensive
- Limited flexibility
- Slow upgrade rate

## Methera MEO

- Similar height to GPS
- Multiple satellites can serve each target area
- Slow moving satellites

- Flexible
- Dynamic
- High-Capacity Density

**Broadband anywhere, anytime**

# Unique & Distinct Advantages

Capacity Density

Dynamic Coverage

Changing Market Dynamics

Scalable System - Low Initial Capex

Why MEO now:

- Radiation Hazard Protection
- Phased Array Antennas
- Launch Costs Reductions

# Summary

- Large and enduring market opportunity
- Complementary to LEO, GEO and Terrestrial (5G)
  - Partner with Governments to improve Critical National Infrastructures
- Novel mix of proven technological building blocks with a unique control system
- Focused on the transient nature of satellite broadband
- Partnership Centric
- 'A' Round Raise is progressing

# Thank you

Chris McIntosh, CEO
