

Presented by

Safeguard The Future: India's First Mission-Critical Communications Conference & Exhibition

FOCUS

- This Conference will focus on **trusted, reliable, secure, and interoperable communications** in public safety, disaster response, utilities, transport, healthcare, and smart cities, as this has become an essential requirement today.
- We are uniting **key stakeholders** from government, emergency response and critical infrastructure organisations, global standards bodies, Regulators, Spectrum Managers, Industries to showcase innovations in critical communications.
- The Conference will be supported by many Government agencies.

HOW CAN YOU ENGAGE?

- **Speak** on breakthrough technologies, standards, and public safety use-cases.
- **Attend** to forge partnerships, shape dialogue, and explore market opportunities in India & international partnering.

About BIF and TCCA

BIF is an independent policy forum and think tank that works towards the development and enhancement of the entire broadband and broadcasting ecosystem in a holistic, technology & service neutral manner.

The Critical Communications Association (TCCA) is a not-for profit association representing all critical communication professionals worldwide and supporting standardised mobile critical communications technologies and complementary applications. TCCA's members include critical communications end users, operators and industry across the globe.
